Welcome to IFU’s OWL doc!

OWL is the high performance Linux computing sytstem of KIT Campus Alpin. It is intended for smaller scale applications, model development, model setup, pre- and post-processing. It is not intended for large-scale production runs, hosting and archiving of data. For such purposes we have excellent national HPC facilities like DKRZ, Jülich, Karlsruhe, ...

Here’s the documentation of the system (still growing). Let me know, if some important things are missing. Have fun! Benjamin

Contents:

- OWL System Overview
 - Components
 - Access
- Software modules
 - Overview
 - Working with modules
- Working on OWL
 - Nodes overview
 - Partitions
 - SLURM
 - Interactive login
 - Job submission
 - Further useful SLURM commands
- Storage system
 - Storage overview
 - BeeGFS storage policy
 - BeeGFS external access
